

SUPERCUISE

All purpose cruising fabric

➔ *Designed for cross-cut sails from 28 to 48 feet*

The cruising sailor's cloth requirements, although different from the racing sailor's are no less demanding. Cruising sails must provide a level of durability in keeping with the demands of the cruising sailor, whether they be blue water, coastal, or weekend excursions. Stretch performance is also a consideration, as efficient sail shapes can help boat speed and handling, making a cruise more comfortable and enjoyable. Finally, good cruising sailcloth must be designed with quality in mind. Sails can be a substantial investment for their owners who will expect years of service from their sail inventory.

Supercruise styles combine quality high tenacity fiber selection with high beat-up constructions for improved stretch resistance, bias stability and fabric recovery. Efficiently woven in a high tenacity polyester and available in wide width for ease of production. With our standard Polyprog finish it can be used across a wide range of applications.

Our Supercruise Polyprog finish is designed to balance shape holding bias stability with an ease of handle that allows for good furling and ease of flake and stacking for the main on the boom.

APPLICATIONS SUPERCUISE

BOAT LENGTH		MAINSAIL		HEADSAIL	
IN FT	IN M	MONOHULL	100% FURLING	135% FURLING	
± 28	± 8	6.0	7.0	5.0	
± 32	± 10	7.0	7.0	6.0	
± 36	± 11	8.0	8.0	7.0	
± 40	± 12	9.0	9.0	8.0	
± 44	± 13	10.0	10.0	9.0	
± 48	± 14	-	-	10.0
