

TARGA

Premium Canopy Fabrics

➔ *Designed for canopies and tents*

TARGA Canopy Fabric is a premium material, based on a polyester weave and coated both sides. The tight weave and coating give TARGA low stretch and bias stability for improved canopy shape holding and overall lighter weight compared to vinyl-based fabrics.

TARGA white and colors are coated both sides with an acrylic polymer coating that works well with most digital printed inks. The white will not yellow with UV exposure and all the colors are UV resistant and will not fade with prolonged outdoor use. TARGA is offered in a range of popular colors including white, cream, red, blue, grey and black.

TARGA's FR resistant coating allows this material to meet both CAL 19 and NFPA 701 FR codes as well as European M2-B2. It is the fabricator's responsibility to determine if any applied inks affect the FR properties of the material.

TARGA CANOPY SPECIFICATIONS

PROPERTY	SPECIFICATIONS
Material	100% Polyester
Construction	Construction 300 x 300 High Tenacity
Weight	9.25 OZ/YD ² 315 G/M ²
Width	60" / 152 CM
Tear ASTM D2261	9 lbs / 8 lbs (W x F)
Tensile Strength ASTM D5034	330 x 230 lbs (W x F)
Coating	2 Passes / Side : Acrylic Polymer
FR Code	USA: NFPA 701, CAL TITLE 19, EU: M2-B2
Water Resistant	Yes
Hydrostat AATTC 127	100 CMS +
Spray Test AATTC 22	70
Stiffness ASTM D4032	15
Colors	White, Cream, Red, Blue, Grey, Black
